The Engineering Services Department creates a 5-year resurfacing plan every 5 years in order to identify the streets in the poorest conditions and to repave them before major repair work is required. In the most recent citizen survey, maintenance of City streets was identified as the number one item that should receive the most emphasize over the next 10 years. Our goal is to continue to work to keep our streets in good repair for as long as possible and repave our streets before they begin to deteriorate.

We solicited bids from area contractors for the unit cost of labor, equipment, and materials necessary to complete the FY 20 Streets Resurfacing Project. The following bids were received and includes the per unit price for all of the pay items needed to resurface the streets:
